**Product:** Dibond®                      **Date:**        **March 22, 2005**  
**Subject:**    **Screen-Printing**              **Revision:**  
**Number:**    **D14**                              **Pages:**     **1**

## Screen-Print Ink Compatibility of Dibond®

Dibond® material is often screen-printed when used in the signage and display industry. Although it would be impossible for any panel manufacturer to run a trial using all of the different types of inks available, Alcan Composites USA, Inc. has coordinated testing with these ink manufacturers using several different inks on Dibond® material.

Certain inks vary in their properties and performance in various applications. Alcan Composites USA, Inc. recommends that you consult with the ink manufacturer if there are any questions regarding the use of a particular ink and to test any application prior to initiating a production run.
