Ryno Board®

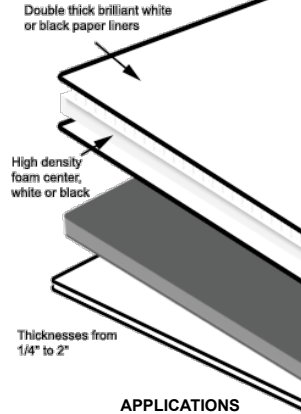

Heavy-Duty Paper Faced Foamboard

**DESCRIPTION:**  
 Heavy-duty foam boards with double-thick surface liners and high-density foam. RYNO BOARD® is are much more resistant to denting and warping than standard paper-faced foam boards. The combination of high density foam centers and double thick surface liners produce rugged yet economical foam boards with exceptional compressive strength and superior dimensional stability.

**FOAM CENTER:**  
 High density with exceptional compressive strength, imparts additional warp-resistance and dimensional stability for mounting, display and exhibit work. Thicker sizes may be used as structural elements in exhibits and displays.

**LINERS:**  
 Double-thick, bright white surface liners contribute to the overall strength and durability of Ryno Board. The pH neutral surface contains UV inhibitors to reduce yellowing. The liners resist moisture absorption, which enhances overall warp resistance. White Ryno boards provide a flat surface for screen printing, with excellent ink hold out characteristics.

**PHYSICAL ATTRIBUTES:**  
 With excellent warp-resistance and dimensional stability, Ryno board is recommended for exhibit and graphics applications that require a stronger, more durable substrate. Also recommended for mounting graphics to be displayed in more demanding environments. Excellent for direct screen printing.

APPLICATIONS

- Exhibits
- Mounting
- POP Displays
- Sets & Props
- Vinyl Graphics
- Signs
- Screen Printing
- Framing
- Inkjet Printing

STANDARD SIZE CHART (White & Black)

Thickness	Width	Length
1/4" 6mm	48"	72"
1/4" 6mm	48"	96"
1/4" 6mm	48"	120" White Only
1/4" 6mm	48"	144" White Only
3/8" 10mm	48"	96"
1/2" 13mm	48"	96"
5/8" 16mm	48"	96"
3/4" 19mm	48"	96"
3/4" 19mm	48"	96"
1" 25mm	48"	96"
1-1/2" 38mm	48"	96"
2" 50mm	48"	96"
