

SureSolv™ SureBet Scrim**

Designed For Solvent and UV Curable Inkjet Inks

SureBet Scrim Banner Products are all manufactured with high quality durable polyester fiber weave. The denier is the yarn weight used to weave each product. Choosing the proper scrim for your application is critical. Lower weights are good for smaller outdoor, indoor and temporary outdoor signs and images. Higher denier 3120 and 3121 is most tear resistant and perfect for larger more durable sign needs.
